Traffic Rules play a very important role in the traffic system of a country. These rules are made for avoiding traffic jams and accidents in cities and towns. Generally, traffic rules are implemented by showing different colored light signals in the road like red light, yellow light and green light. We have to stop our vehicles when the red light is on and move our vehicles when the green light is on. Driving on the left side of the road, using foot over bridge, following traffic signs, not to blow horns before a hospital or a school etc are also included in the traffic rules.
